

## Cultural Immersion Program

Our cultural immersion program is based on a progressive, experiential approach, allowing students to actively interact with the city and its sociocultural dynamics. It is structured into four three-month cycles, through which students progress:

- **LIVE:** First exposure to the immediate environment. Students become familiar with their neighborhood, local services, and rules of coexistence, developing basic intercultural communication and observation skills.
- **EXPRESS YOURSELF:** Development of expressive skills and cultural analysis through games, group dynamics, and discussion spaces that encourage critical reflection.
- **JOIN THE COMMUNITY:** Students delve into the history, laws, customs, and diversity of Barcelona and Spain, consolidating their understanding of the local and national context.
- **DISCOVER:** Students are invited to conduct personal research on some cultural aspect of the city and present their findings, integrating what they have learned from a personal and intercultural perspective.

This course promotes not only gradual adaptation but also the acquisition of a solid cultural awareness and the ability to navigate multicultural environments in a respectful, critical, and active manner.
